**History Details:** Appointment Notes: Walked in- red eye EP

## Patient History for Daisy - 01/01/1970 to 19/02/2026

Right red eye since saturday. Little diarrhoea as well. History of going in garden. No change in diet.

Left eye - normal. Right eye - inflamed conjunctiva, profuse blood supply over the cornea. (o mentioned that the redness is less today compared to saturday). No swelling noticed around the eyes, no ocular discharge, PLR present, menace reflex present. Fluoro dye instilled and no area of uptake seen.

No pain, discomfort or abnormal structure felt in abdominal palpation, no enlarged LNs.

Heat stress?

Advised maxitrol and probiotics. Recheck in 2-3 days.

**History Details:** Dear Mrs Erturk,

Please find attached copy of the EHC which you need to apply on APHA website in order for Daisy to travel to Turkey.

https://www.gov.uk/export-health-certificates/export-cats-and-dogs-to-turkey-certificate-3818

Daisy has been vaccinated against rabies on the 17th October 2024 and on the 10th October 2025.
She has had rabies blood test on the 18th November 2024.

She needs to be examined within 24hrs before the travel.

Kind Regards
